

INTERNATIONAL MASTER IN SUSTAINABLE DRUG DISCOVERY

ABOUT

The S-DISCO programme is a 2-year full-time Master programme.

The programme is organized by 4 European universities.

Students will perform a master thesis in one of the (associated) partner institutions (worldwide academic or industry).

Successful students will obtain a common master degree of the partner universities.

Financial support is given to a selected number of students.

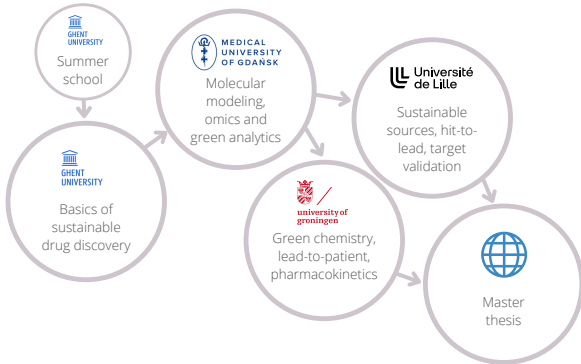

Limited number of students admitted to have small interactive classes.

PROGRAMME

Do you want to learn more about drug discovery and how this can be done in a sustainable way? Well, this master programme then perfectly fits your goals! In this master programme, the focus is set on drug discovery, which is the **challenging phase in the life cycle of a medicine** that precedes first-in-human studies and clinical development. The programme is unique in that it will pay notable **attention to sustainability**, an aspect that currently receives little attention in traditional educational programmes in this area. Sustainability boundaries, including environmental, ecological and socio-economic dimensions, add an extra level of complexity to drug discovery, but are of increasing importance to competent authorities and the society at large.

MOBILITY

ADMISSION

Bachelor in Medical, Pharmaceutical, (Bio-)engineering, Biological or Chemical sciences.
Certificate of proficiency in English (min. B2 level).

This Erasmus Mundus Joint Master was selected by the European Commission (EAC/A01/2021-101049847).
